

wastespresso

Welcome

At **Wastespresso**, we share the world's love for coffee—just like the 2.5 billion coffee cups enjoyed daily. But did you know that **99% of coffee grounds end up in dumpsters**, contributing to greenhouse gas emissions?

Well, we're here to change that. With our patented technology, **we transform spent coffee grounds into high-performance biomaterials.**

In this catalogue, discover how our resurrected materials turn into innovative products that make sustainability a stylish part of everyday life.

How Do We Do It?

Circular Products

Cupcycle

StrawCo

BioCandle

Cupcycle

CUPCYCLE

Cupcycle is a unique coffee cup made from upcycled spent coffee grounds. It is the perfect companion for your daily rituals—reducing waste while making a bold statement wherever you go. Thanks to its double layer design it keeps your drink warm (or cold) while you are on the go.

Weight: 114gr
Body Material: Recyclable biocomposite
Plug Material: Food-contact silicone
Max. Temperature: 90°C / 194°F

StrawCo

wastespresso

Bean Straw is a stylish, eco-design and %100 biodegradable alternative to conventional straws.

Made from spent coffee grounds and starch based food surplus,

it contains no plastic, doesn't go soggy in the drinks, and leaves no aftertaste. Ideal for any cold beverage, Bean Straw delivers a sustainable sipping experience with a clean conscience.
